Managed IT from Techwhizz Network Solutions

Techwhizz Network Solutions will handle your IT challenges, ensuring your organization is safe, productive, and receiving maximum benefit from your technology.

Technology is the backbone of modern business, from the smallest operations to world-spanning enterprises. You don't have time to worry about your Information Technology *and* be the best at what really matters to you and your customers, right? Cybersecurity, compliance, networking, data backups…and that's just for starters.

Help Desk & Remote Access

We offer **quick and reliable tech support** to address day-to-day IT problems. Our technicians are standing by to respond to any issue, small or large.

Layered Cybersecurity

Cybersecurity protection is not a one-size-fits-all challenge. We'll determine the right mix of security solutions for your environment and risk factors, ensuring the **highest level of protection while meeting compliance standards.**

Data Backup & Recovery

Techwhizz Network Solutions will assess your IT environment and operational needs to create your Disaster Recovery plan. From there, we **protect your systems and valuable data** from ransomware, natural disaster, hardware crashes, and other threats.

Patch Management

We use the latest scanning and automation tools to ensure your hardware and software are kept up to date for **smooth, secure operations.**

Data Backup & Recovery

Techwhizz Network Solutions will assess your IT environment and operational needs to create your Disaster Recovery plan. From there, we protect your systems and valuable data from ransomware, natural disaster, hardware crashes, and other threats.

Why Work with Us?

- Leverage highly specialized and experienced experts at a fraction of the cost of staffing your own IT department
- Gain access to the latest technologies and applications
- Quickly and easily scale up or down according to changing needs
- Ensure critical IT security is in place and continuously monitored
- Enjoy predictable, flat-rate IT costs every month

Network & Device Monitoring

We'll remotely monitor your systems around the clock, keeping them safe and operational. Our proactive approach allows us to find and investigate potentially threatening activity on your network so it can be addressed before it impacts productivity.

IT Infrastructure

Your IT infrastructure -- the hardware and cabling that supports your applications and other technologies is what keep you operational and productive. We bring your organization expert deployment and management of this essential part of your business.

Strategic IT Consulting

The Techwhizz Network Solutions team works with you to fully understand your long-term technology needs. We'll work with you to develop robust plans for **security, business continuity, productivity, and IT scaling** -- all based on your unique operational requirements.
